

DID YOU KNOW?

Israelis invented Internet messenger technology, the first ingestible video camera and the first PC anti-virus software. Israel is a world leader in environmental research, high-tech industry and the arts. Israel: More than you ever imagined. To learn more, visit your campus Hillel or www.hillel.org.

Optoelectronic Research Lab at Technion University in Haifa, provided by the American Technion Society, <http://www.ats.org>.
